Experience

Research Strategist – **Cooperative AI Foundation (CAIF)** – London, UK — June 2026 – Present

- Support CAIF's policy engagements by providing technical input on policy outputs for audiences including NIST, FMF, ISO, and the EU AI Office; meeting with policymakers and stakeholders; and running a wargame for senior national security officials on cross-border AI incidents.
- Lead ORBIT, an open source framework for multi-agent security evaluations built on Inspect; set its research roadmap and manage three engineers; supervise three SPAR fellows building automated multi-agent evaluations.
- Co-lead an upcoming report on the scientific foundations of multi-agent safety and security evaluations.
- Mentor an ERA fellow developing an information-sharing framework for the Frontier Model Forum to prevent multi-agent misuse; supervised an XLab fellow project on collusion detection in latent multi-agent communication.

MATS Research Fellow – **Witt Lab, Oxford & UCL** – Berkeley, CA & London, UK — Jan. 2026 – May 2026

- Co-led engineering and design of ORBIT, covering threats from prompt infection to secret collusion across coding agent swarms, web agents, and computer use agents (NeurIPS 2026).
- Showed how system architecture shapes refusals and misuse risk in multi-agent systems (ICML 2026); co-authored an updated foundational taxonomy of multi-agent security risks.
- Co-authored disclosure guidelines for frontier developers' internally deployed AI systems (ICML TAIGR 2026).

Research Fellow – **UChicago XLab** – Chicago, IL — June 2025 – Jan. 2026

- Led a project on demonstrating and defending against diffuse, hard-to-detect attacks against multi-agent systems in critical infrastructure, advised by Dr. Lewis Hammond.
- Analyzed deterrence dynamics for superintelligence projects, assessing viability of cyber, economic, and kinetic interventions, advised by Morgan Plummer.

Research Fellow – **Yiqiao Zhong Lab** – Madison, WI — Jan. 2025 – Jan. 2026

- Studied how RL post-training affects LLM robustness; built a post-training pipeline with verifiable rewards in TRL.

Selected Publications

* major contribution

ORBIT: A Framework for Multi-Agent Safety and Security Evaluations — *NeurIPS 2026 (D&B)*
B. Hagag*, **W. L. Anderson***, S. Chakraborty, C. S. de Witt

Architecture Matters for Multi-Agent Security — *ICML 2026*
B. Hagag*, **W. L. Anderson***, C. S. de Witt, S. Scheffler

What Should Frontier AI Developers Disclose About Internal Deployments? — *ICML 2026 TAIGR*
J. Charnock, R. Mehta Moreno, J. Miller, **W. L. Anderson**

Open Challenges in Multi-Agent Security: Towards Secure Systems of Interacting AI Agents — *arXiv 2026*
C. S. de Witt, K. Krawiecka*, I. Krawczuk*, B. Hagag*, **W. L. Anderson***, et al.

Selected Presentations and Writing

- *Lessons from Recent Multi-Agent Safety Incidents*, Cooperative AI Foundation Blog — Aug. 2026
- *South Korea and the HBM Bottleneck*, with C. Li et al., WAISI Research Blog — Dec. 2025
- *Wargame on Cross-Border AI Incidents* (upcoming), Athens Roundtable, Brussels — Nov. 2026
- *A Framework for Multi-Agent Safety Evaluations*, UK AISI Human Influence Series, London — Oct. 2026
- *Security Risks in Multi-Agent AI Systems*, Advanced AI Congressional Exposition, Washington, DC — Feb. 2025
- *Panelist*, Wisconsin Technology Council Panel on AI Safety, Madison — Oct. 2025

Leadership

Director, Operations Lead – **Wisconsin AI Safety Initiative** — Sept. 2023 – Dec. 2025

- Directed a 30-person leadership team running programs for an organization with a $40,000 budget; co-organized the 150-person AI Meets Society Symposium, featuring professors, AI safety researchers, and state lawmakers.

Education

University of Wisconsin–Madison – BS in Data Science, Computer Sciences Certificate — Sept. 2023 – Dec. 2025

- GPA: 4.0/4.0; Sophomore Research Fellowship; Coefficient Giving University Organizer Fellowship
